## Vinit Kumar

Project Architect,

Vinit's design philosophy revolves around observation and innovation. Using this lens, he strives to create diverse, integrated and dynamic spaces that connect people to their environment. He believes that a well-designed space comes from an approach that brings together a good balance of environmental, social, and economic values. He also believes that a structured approach to design development and detailing forms the spine of any successful project, and creates the hidden order that leads to visual harmony.
